

## Scale Check

To check that this page has printed to the correct scale, please place a ruler against the line below. The length of the line from 0 to 15 should measure at between 14.5 and 15.5cm. When printing ensure that any scaling (e.g. "fit/reduce to margins") is turned off.

## Ring Comparison

Place an existing (preferably flat) ring over each of the circles below, until the edge of the circle is just hidden by your ring all around.

## Finger/Ring Sizer

Cut out the strip below and wrap it around the largest knuckle (arrow first). Find the ring size by checking the corresponding line at the edge of the strip.
